Fully Mobile Container Swimming Pool

INSTALLATION PROCESS

Step 1 - Site Survey

Initially our team will visit you to make sure the site is suitable and delivery can be made without any problems. Things which need to be considered are

- Ground Quality
- Lorry Access
- Sharp Bends
- Access for cranes
- Low Bridges / Cables or Obstacles on Delivery Route
- Ferry Crossings / Road Restrictions

Step 2 - Mark Out And Prepare Site

The Second step is the main marking out and clearing of the site. The ground should be a level as possible and solid to sit the container

Step 3 - Foundation

If needed the container pool foundations should be prepared. This could be just flat ground, cement slab, piled foundations or a steel structure. Each site is different.

Step 4 - Pool Delivery

We then arrive with the Pool on a lorry and lift into position.

Step 5 - Fill Up And Turn On

Once the pool is in place simply fill it up and Plug it in. Ready to go

Step 7 - Party Time!

Finally the wine and beer is open and the first person is thrown into the pool to celebrate another successful installation.

All this is normally completed in less than 1 Week!
